

PRO-CHEM-CO, INC.

TECHNICAL DATA

PRO-GLIDE

MULTIFUNCTIONAL LUBRICANT

DESCRIPTION:

PRO-CHEM-CO's **PRO-GLIDE** is a multifunctional lubricant/corrosion preventative/anti-wear compound/ for use in high temperature, high humidity, marine, chemical or other extreme environments. **PRO-GLIDE**'s high viscosity index, shear strength, and synthetic additives provide **heat resistance, rust protection, and tenacious film coverage** on **all** metal surfaces. **PRO-GLIDE**'s lubricity eliminates chatter, squeaks, and vibration associated with metal-to-metal contact.

BENEFITS:

- Outstanding corrosion resistance (indoor & outdoor)
- Outstanding "cling" properties (hot or cold surfaces)
- Versatile under extreme atmospheres
- Safe/Operator Friendly (high flash/non-toxic)
- Steam, Salt, Heat, Chemical Resistant Film
- Reduces wear and part breakage
- Outstanding hydrodynamic lubrication
- Non-staining to all metals and alloys
- Easy to use (straight or diluted)
- Economical (concentrated – low end use cost)

APPLICATIONS:

- Chain Lubricant
- Fork Lift Lubricant
- Way Lubricant (heavy-duty)
- Conveyor Lubricant
- Vertical Guide Lubricant
- Chain Drives
- Cable Lubricant
- Open Gear Lubricant
- Anti-Seize Lube
- Machine Tool Screw Lube
- Universal Joint Lubricant
- Vacuum Welding Machine Lube

Anywhere things slide or move and require long-term corrosion protection.

DIRECTIONS FOR USE:

PRO-GLIDE is normally applied by brush, swab, or oil can as is. It can also be diluted with mineral sprits for spraying and/or easier handling methods.

PROPERTIES:

Appearance -----	Clear, Thick, Amber Colored Liquid
Odor -----	Bland
Flash Point -----	Over 400°F
Viscosity -----	40,000 S.U.S. @ 100°F
Specific Gravity -----	0.878

PACKAGING:

PRO-GLIDE is available in aerosol, 1-gallon cans, 5-gallon pails, and 55-gallon drums.
